Profile Summary

Results-driven Full Stack Developer with hands-on experience building scalable and secure web applications using **React.js**, **Redux**, **ASP.NET Core Web API**, **Node.js**, and **MongoDB**. Proficient in designing RESTful APIs, implementing authentication (JWT, OAuth), and developing responsive user interfaces. Strong experience with SQL Server, MySQL, and MongoDB, along with clean architecture and modern development practices. Passionate about delivering high-quality, maintainable solutions and continuously improving through real-world project experience.

Education

Sri Lanka Institute of Information Technology (SLIIT) | Malabe

BSc (Hons) in Information Technology (Specialized in IT) | Oct 2022 – Present

- Completed a **Higher Diploma in IT**
- Successfully completed **Year 4, Semester 1** without repeats

Rajapaksha Central College | Weeraketiya

Advanced Level Examination (2021)

- Chemistry (B), Physics (B), Combined Mathematics (C)

Ordinary Level Examination (2017)

- Science (A), Mathematics (A), English (C), Entrepreneurship Studies (A), History (A), Sinhala (B)

Professional Experience

QA / Development Intern

ABI Systems (Pvt) Ltd | Aug 2025 – Feb 2026

- Lead QA activities in Agile environment ensuring high-quality releases
- Performed manual and automated testing improving defect detection efficiency
- Maintained and enhanced automation scripts for mobile applications
- Collaborated with developers for debugging and issue resolution
- Contributed to Software Development Life Cycle (SDLC) processes

Technical Skills

Languages: JavaScript (ES6+), C#, SQL

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend: ASP.NET Core Web API, Node.js (Express)

Databases: SQL Server, MongoDB, MySQL

Authentication: JWT, Google OAuth, Role-Based Authorization

Tools: Git, GitHub, Postman, Visual Studio, VS Code, Docker

Concepts: RESTful APIs, Clean Architecture, Dependency Injection, OOP

Projects

T-Shirt E-Commerce Web Application (Individual)

- **Technologies:** ASP.NET Core Web API, C#, SQL Server, Entity Framework Core, React.js, Redux Toolkit, JWT, Refresh Tokens, Role-based Authorization, RESTful APIs, Tailwind CSS, AutoMapper, AWS S3, Google OAuth
- **Description:** Developed a full-stack e-commerce web application for selling T-shirts with a secure backend and role-based access for Admin and User roles.
 - Implemented secure authentication using email-password and Google OAuth with JWT and refresh tokens, and protected backend APIs and frontend routes using role-based authorization.
 - Designed and developed a full product management system supporting multiple images, size/color variants, and stock handling using ASP.NET Core, Entity Framework Core, and SQL Server.
 - Built end-to-end cart and order workflow including add-to-cart, checkout, order placement, stock validation, and order history tracking with real-time updates.
 - Developed an admin dashboard for managing products, users, and orders, integrated AWS S3 for image uploads, implemented email-based password reset, and built a responsive frontend using React, Redux Toolkit, Axios, and Tailwind CSS following clean architecture principles.

Arogya Medi House / Doctor Appointment System (Individual)

- **Technologies:** ASP.NET Core Web API, C#, SQL Server, Entity Framework Core, React.js, Redux Toolkit, JWT, Role-based Authorization, RESTful APIs, Tailwind CSS, AutoMapper, OAuth
- **Description:** Developed a full-stack doctor appointment with secure backend and role-based access for **SuperAdmin, doctor, patient, and receptionist roles**.
 - Implemented authentication(email- password and **google OAuth**) and authorization using **JWT** and protected both backend APIs and frontend routes based on user roles.
 - Developed modules for department management, doctor management, patient management, receptionist management, doctor availability, leave handling, doctor schedule management, booking requests, payment confirmation, and action logging.
 - Designed a **SQL Server database** to manage structured appointment data while maintaining data integrity
 - Integrated a React.js frontend with Redux Toolkit for efficient state management Followed dependency injection and clean architecture practices to ensure maintainability, scalability, and production-ready backend performance.

School Management System (Individual)

- **Technologies:** Redux, React.js, ASP.NET Core, C#, SQL Server, JWT, Policy-based & Role-based Authorization, RESTful APIs
- **Description:** Full-stack school management system with secure authentication and role-based access for Admin, Teacher, and Student roles.
 - Designed and developed secure RESTful APIs using ASP.NET Core with JWT-based authentication and policy-based authorization.
 - Implemented modules for student management, teacher management, subject management, attendance tracking, and exam management.
 - Built responsive frontend using React.js with Redux for centralized state management and protected routes.
 - Designed and optimized SQL Server database schemas to ensure data integrity, performance, and scalability.

Shopping Mall Management System (Group Project)

- **Technologies:** MERN Stack (MongoDB, Express.js, React.js, Node.js), Role-Based Access Control (RBAC), RESTful APIs
- **Description:** Comprehensive web-based system to manage mall operations including users, shops, transactions, parking, and memberships.
 - Developed secure RESTful backend APIs using Node.js and Express.js for user, shop, and transaction management.
 - Implemented role-based access control (RBAC) for admin, staff, and customer-level permissions.
 - Designed MongoDB schemas for transaction processing, parking management, and membership rewards tracking.
 - Built responsive and dynamic frontend interfaces using React.js for real-time data updates and analytics dashboards.

Resume Analyzer (Individual)

- **Technologies:** MERN Stack, Flask, NLP, Google OAuth, JWT, OTP, Microservices
- **Description:** Comprehensive system to manage users, shops, and transactions.
 - Implemented secure authentication using JWT and Google OAuth.
 - Designed backend APIs for resume processing and keyword extraction.
 - Applied RESTful API architecture and token-based access control.

Vehicle Advertisement System (Individual)

- **Technologies:** Django, MySQL, Bootstrap
- **Description:** Web-based platform for posting and browsing vehicle listings.
 - Implemented **advanced search and filtering features**, secure advertisement posting with data validation, and robust user authentication for personalized access.
 - Optimized the application for **responsive design**, ensuring seamless performance across multiple devices and screen sizes.

Social Media Platform (Individual)

- **Technologies:** Node.js, Express, MongoDB, Socket.io
- **Description:** Scalable social media platform with posts, messaging, and user interactions.
 - Built **real-time messaging, post interactions, and follow/unfollow system**.
 - Implemented **secure user authentication** and profile management.

Live Chat Application (Individual)

- **Technologies:** Node.js, Express, React.js, WebSockets
- **Description:** Real-time chat application supporting messaging and file sharing.
 - Enabled **editing, deletion, and sharing of messages** with real-time updates.
 - Integrated **MongoDB** for efficient message storage and retrieval.

Online Class Management System (Team)

- **Technologies:** React.js, Node.js, MongoDB, Express
- **Description:** Platform to manage classes, exams, notifications, and live interactions.
 - Developed class scheduling, exam management, and automated notifications.
 - Implemented live chat per class for real-time student-teacher interaction.

YouTube Clone (Individual)

- **Technologies:** React.js, Tailwind CSS, YouTube Data API
- Built a video browsing platform with dynamic API integration and responsive UI.

Additional Information

- **Language:** English (Intermediate), Sinhala (Native)
- **Interests:** Web & Mobile application development, problem-solving.
